Build your custom Menus, Easy Drag & Drop editing.

This system is based on Laravel, the advantage of this software is that it is a web system, allowing it to be accessed from a PC, Tablet or Smartphone possessing an Internet connection and a webservices api's ready (only for cargo mobile applications, until now we don't have documenation for them).

The client have the ability to login and request or track his packages.

**1. Sign up and get your example U.S. Address**

This will be your own personal address in the USA. No sign up or setup fees.

**2. Shop in any U.S. Store and ship it to your new U.S. address**

Use your example U.S. address as your delivery address at checkout.

**3. Combine your packages and save money**

Shop on multiple websites, combine the packages into one box and save up to 80% on shipping.

Join example to get your free U.S. address!

**Package consolidation is so easy!**

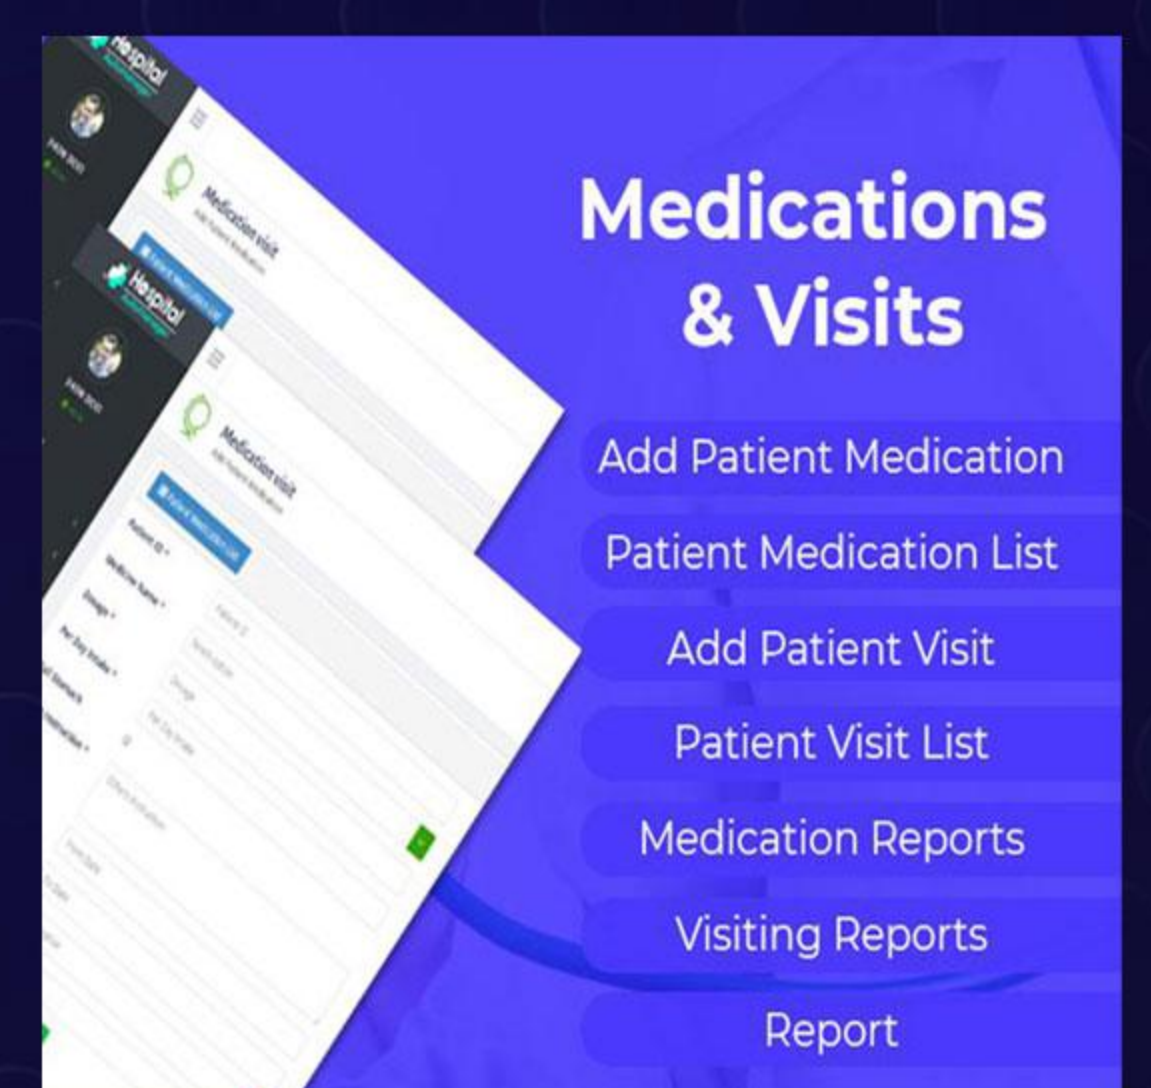

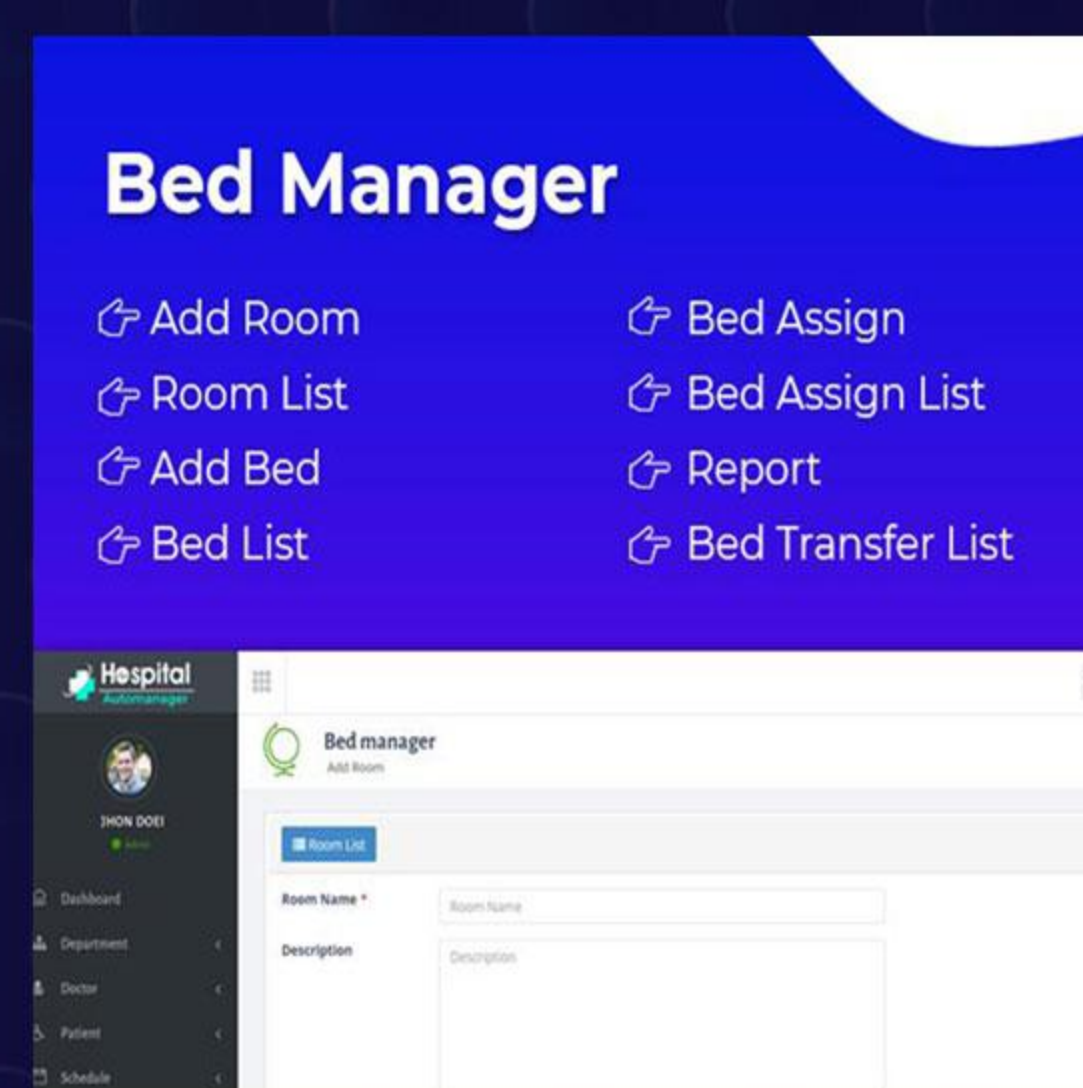

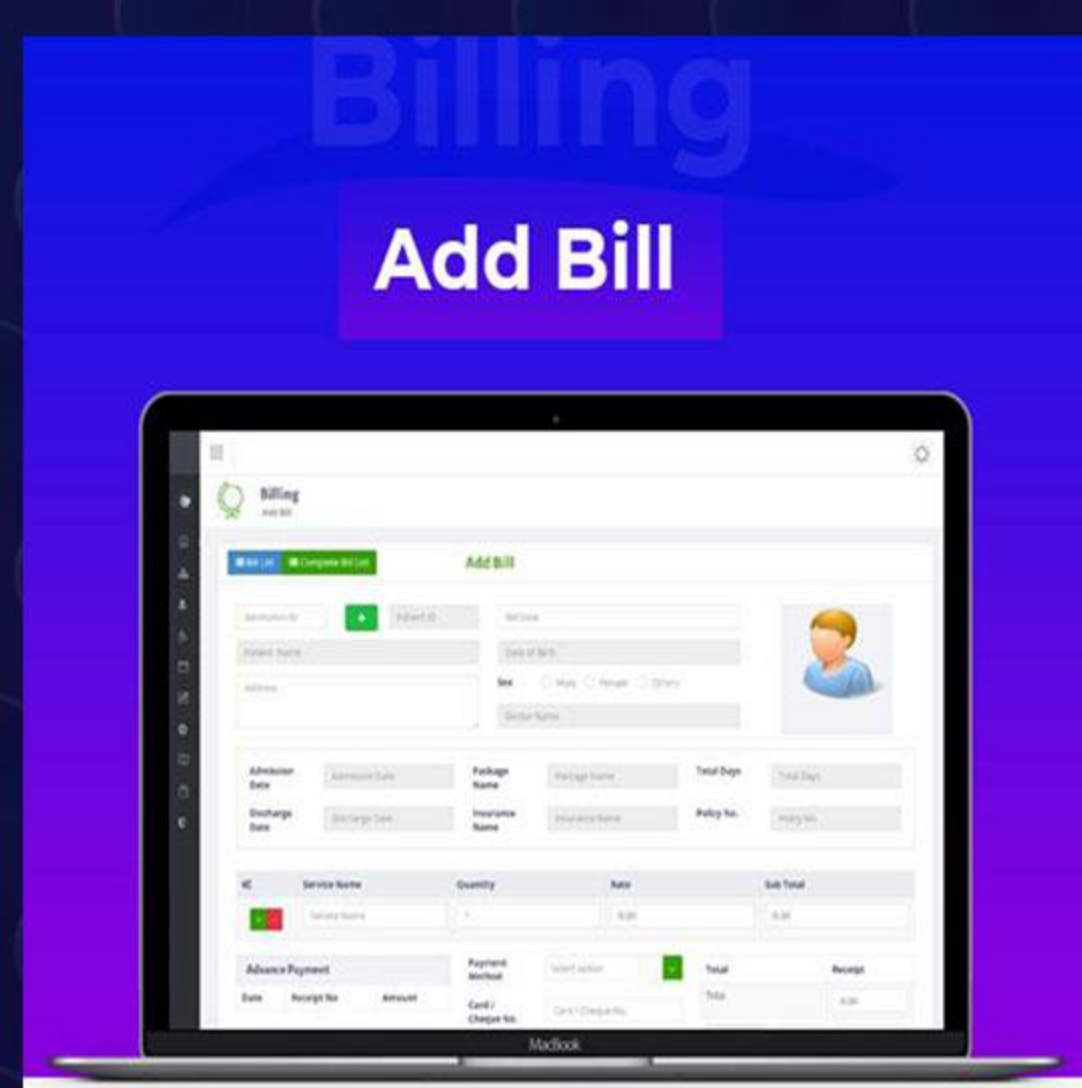

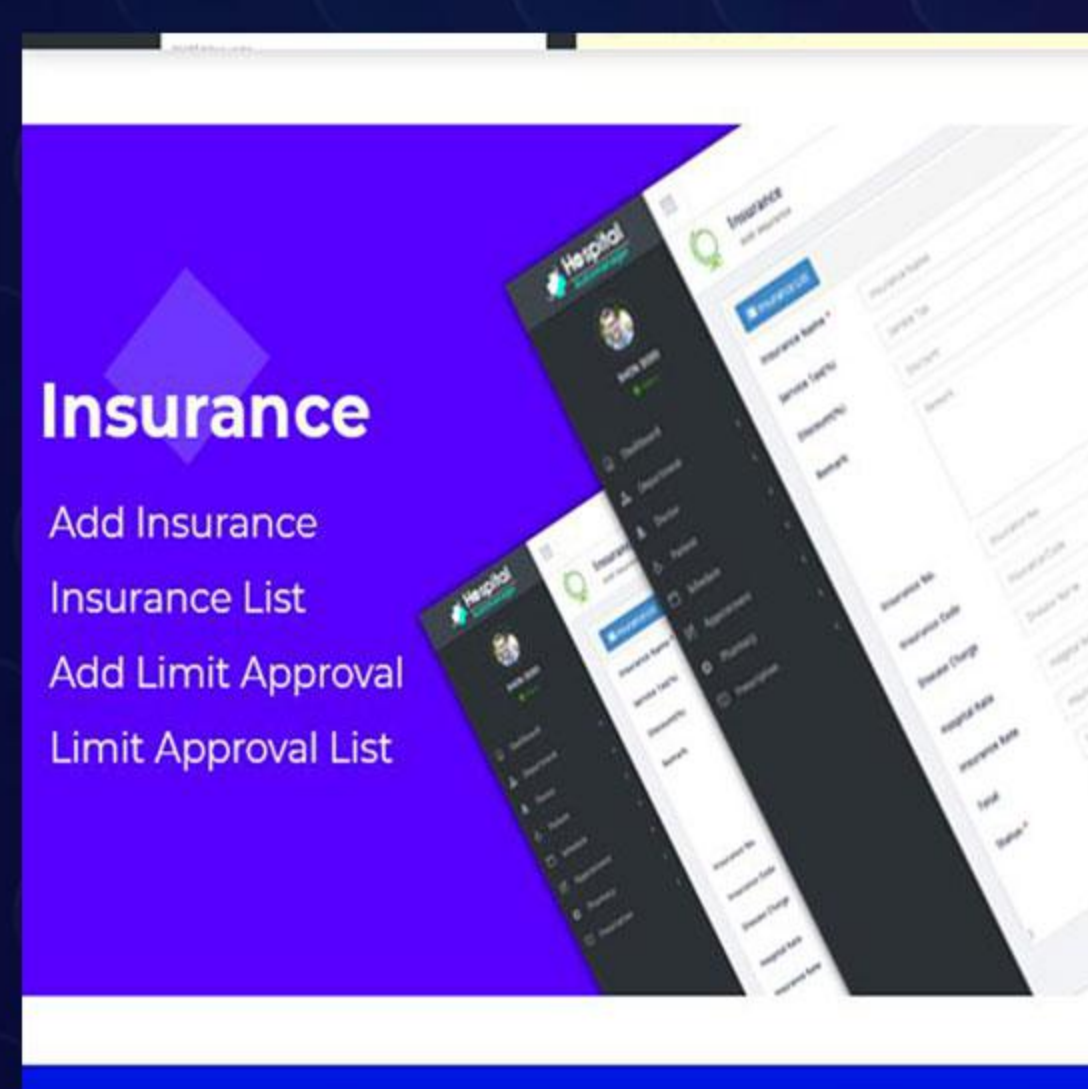

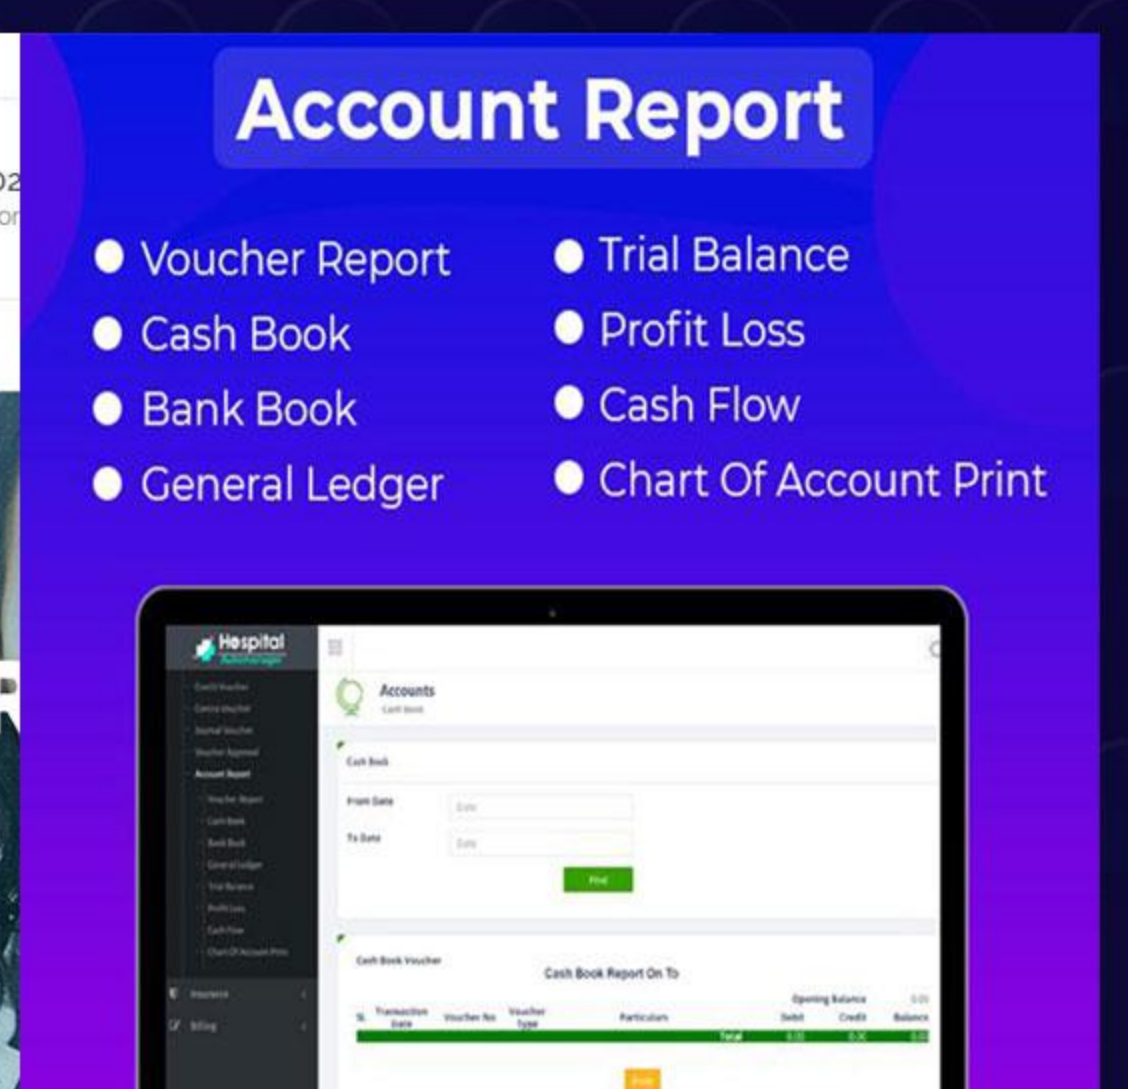

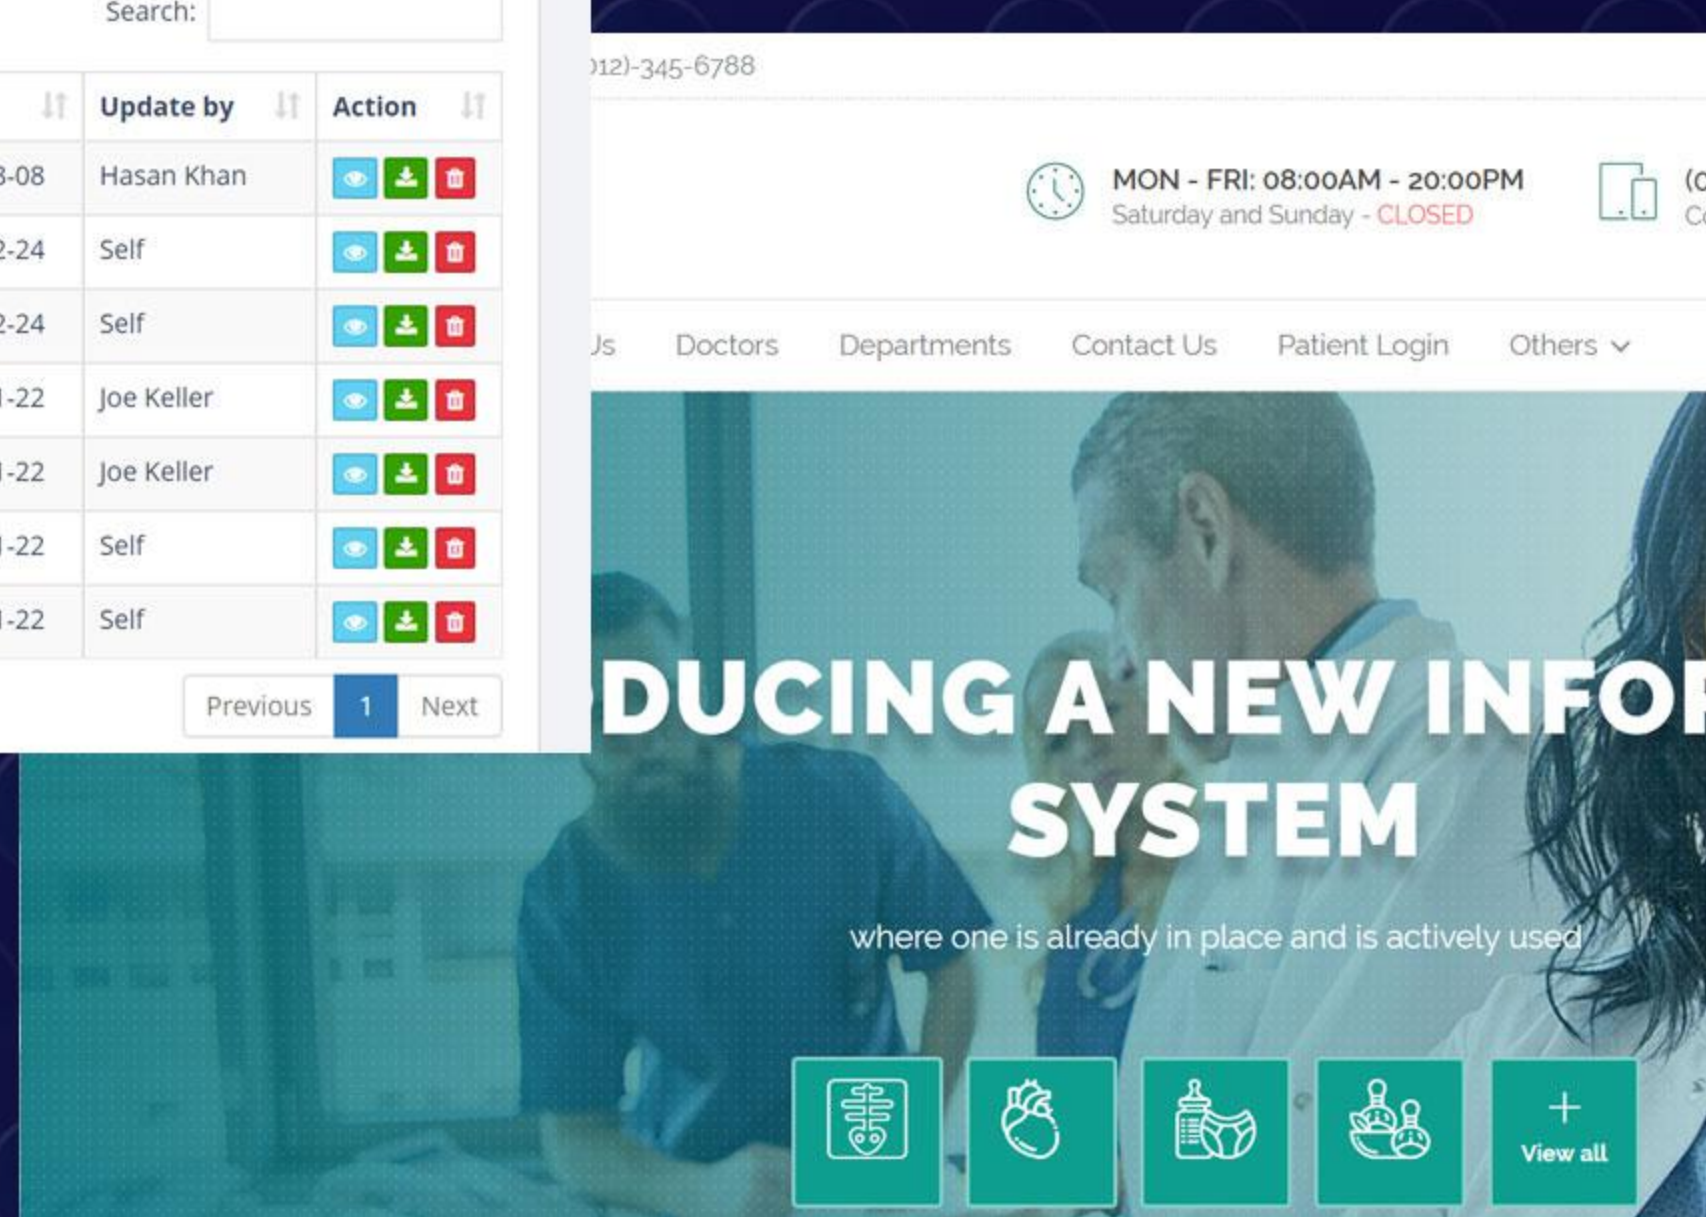

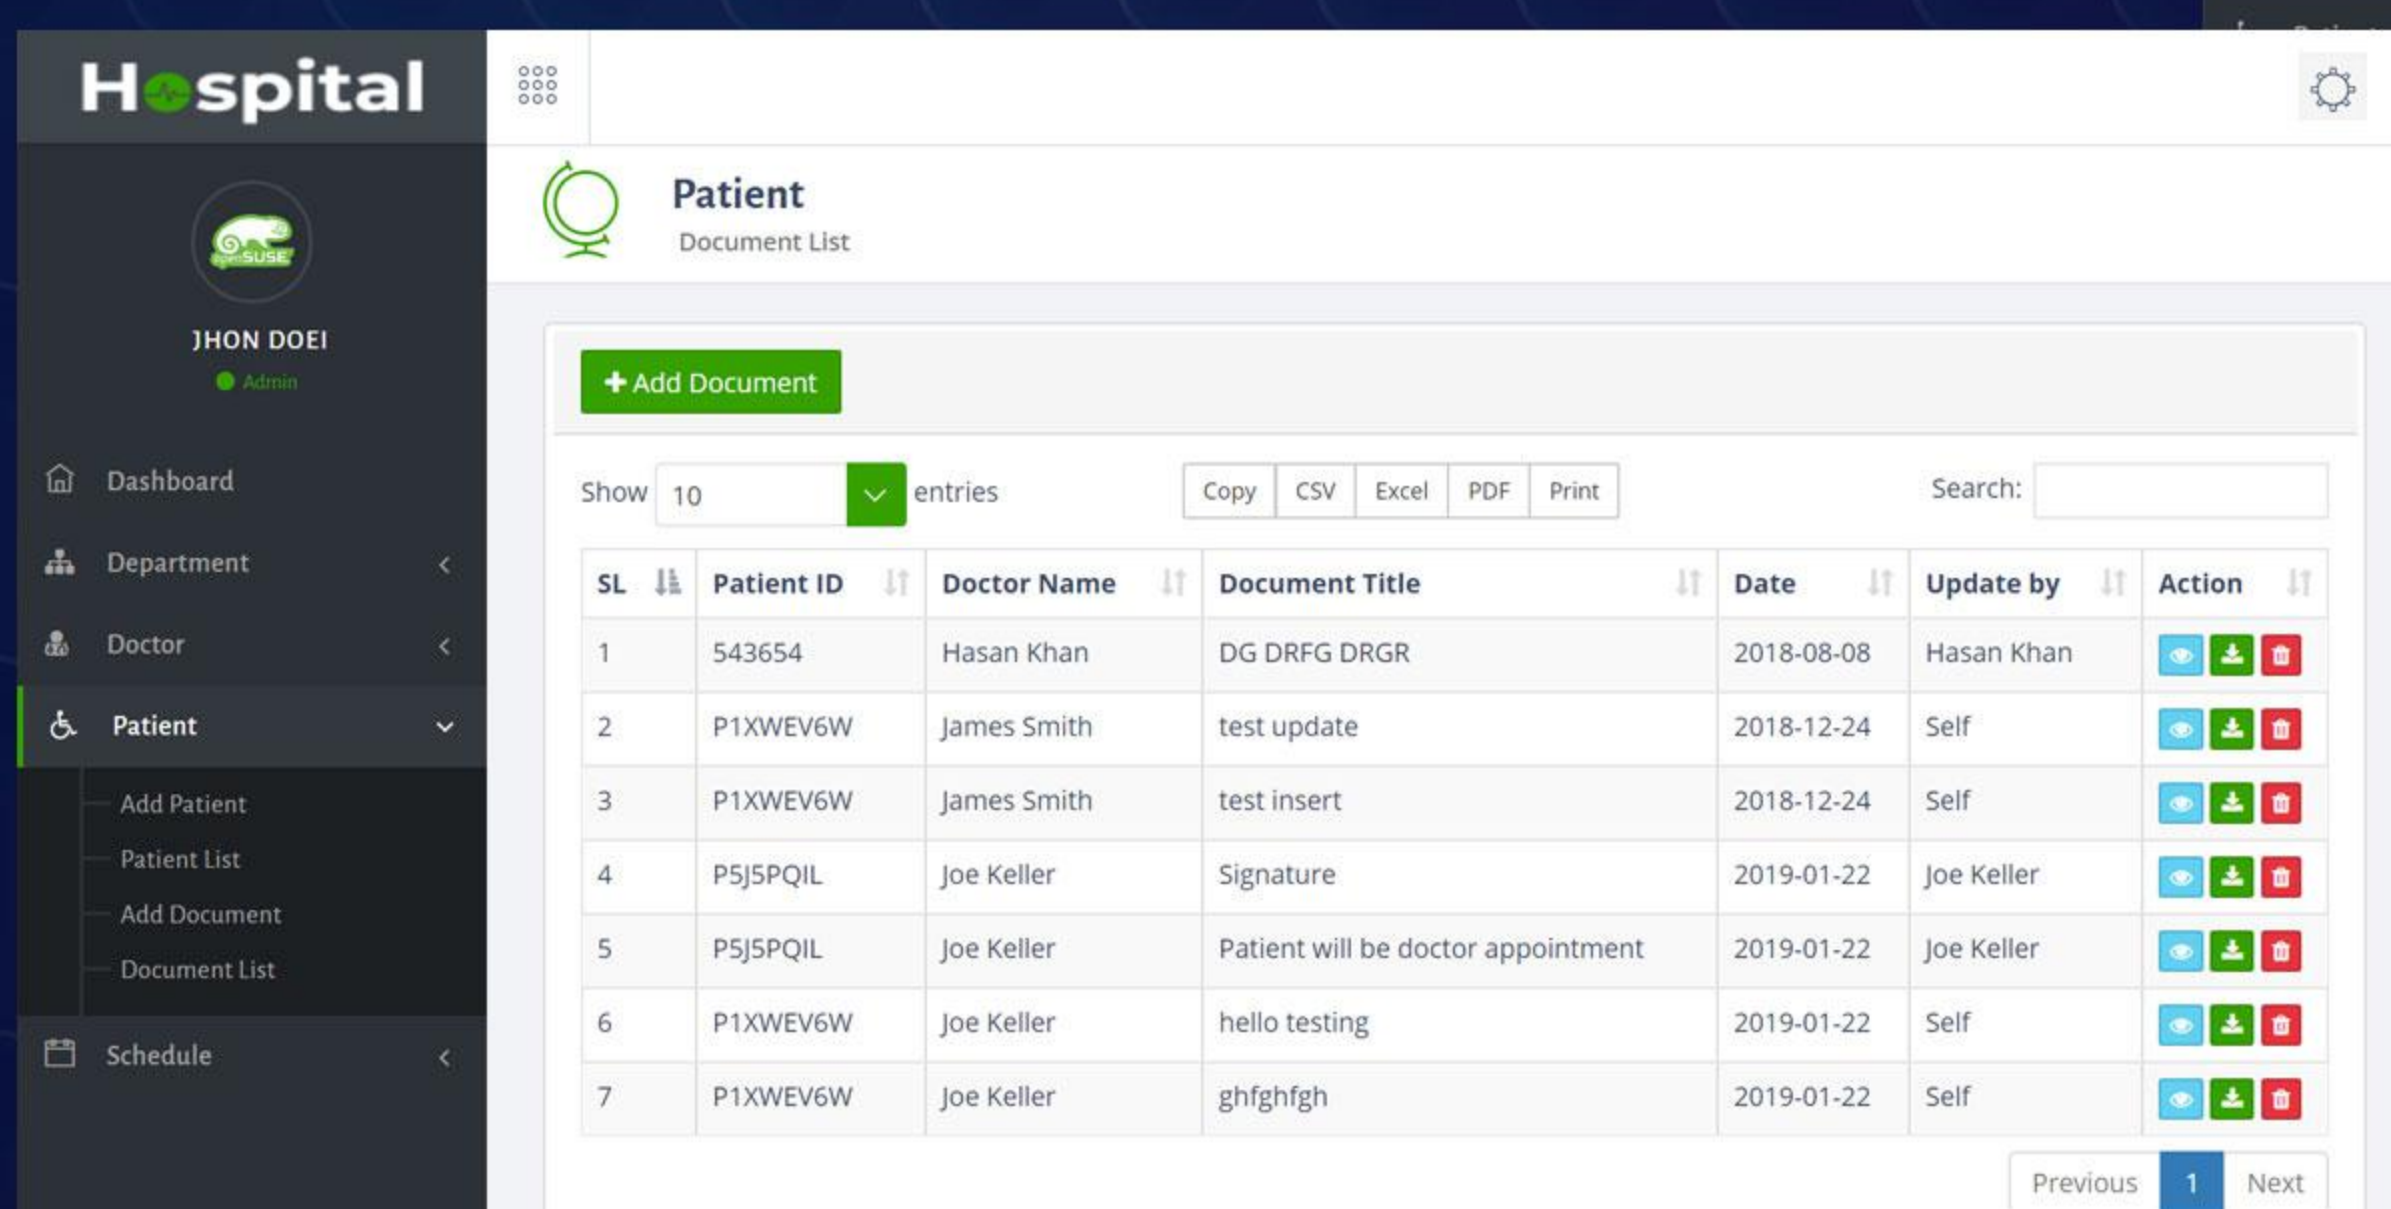

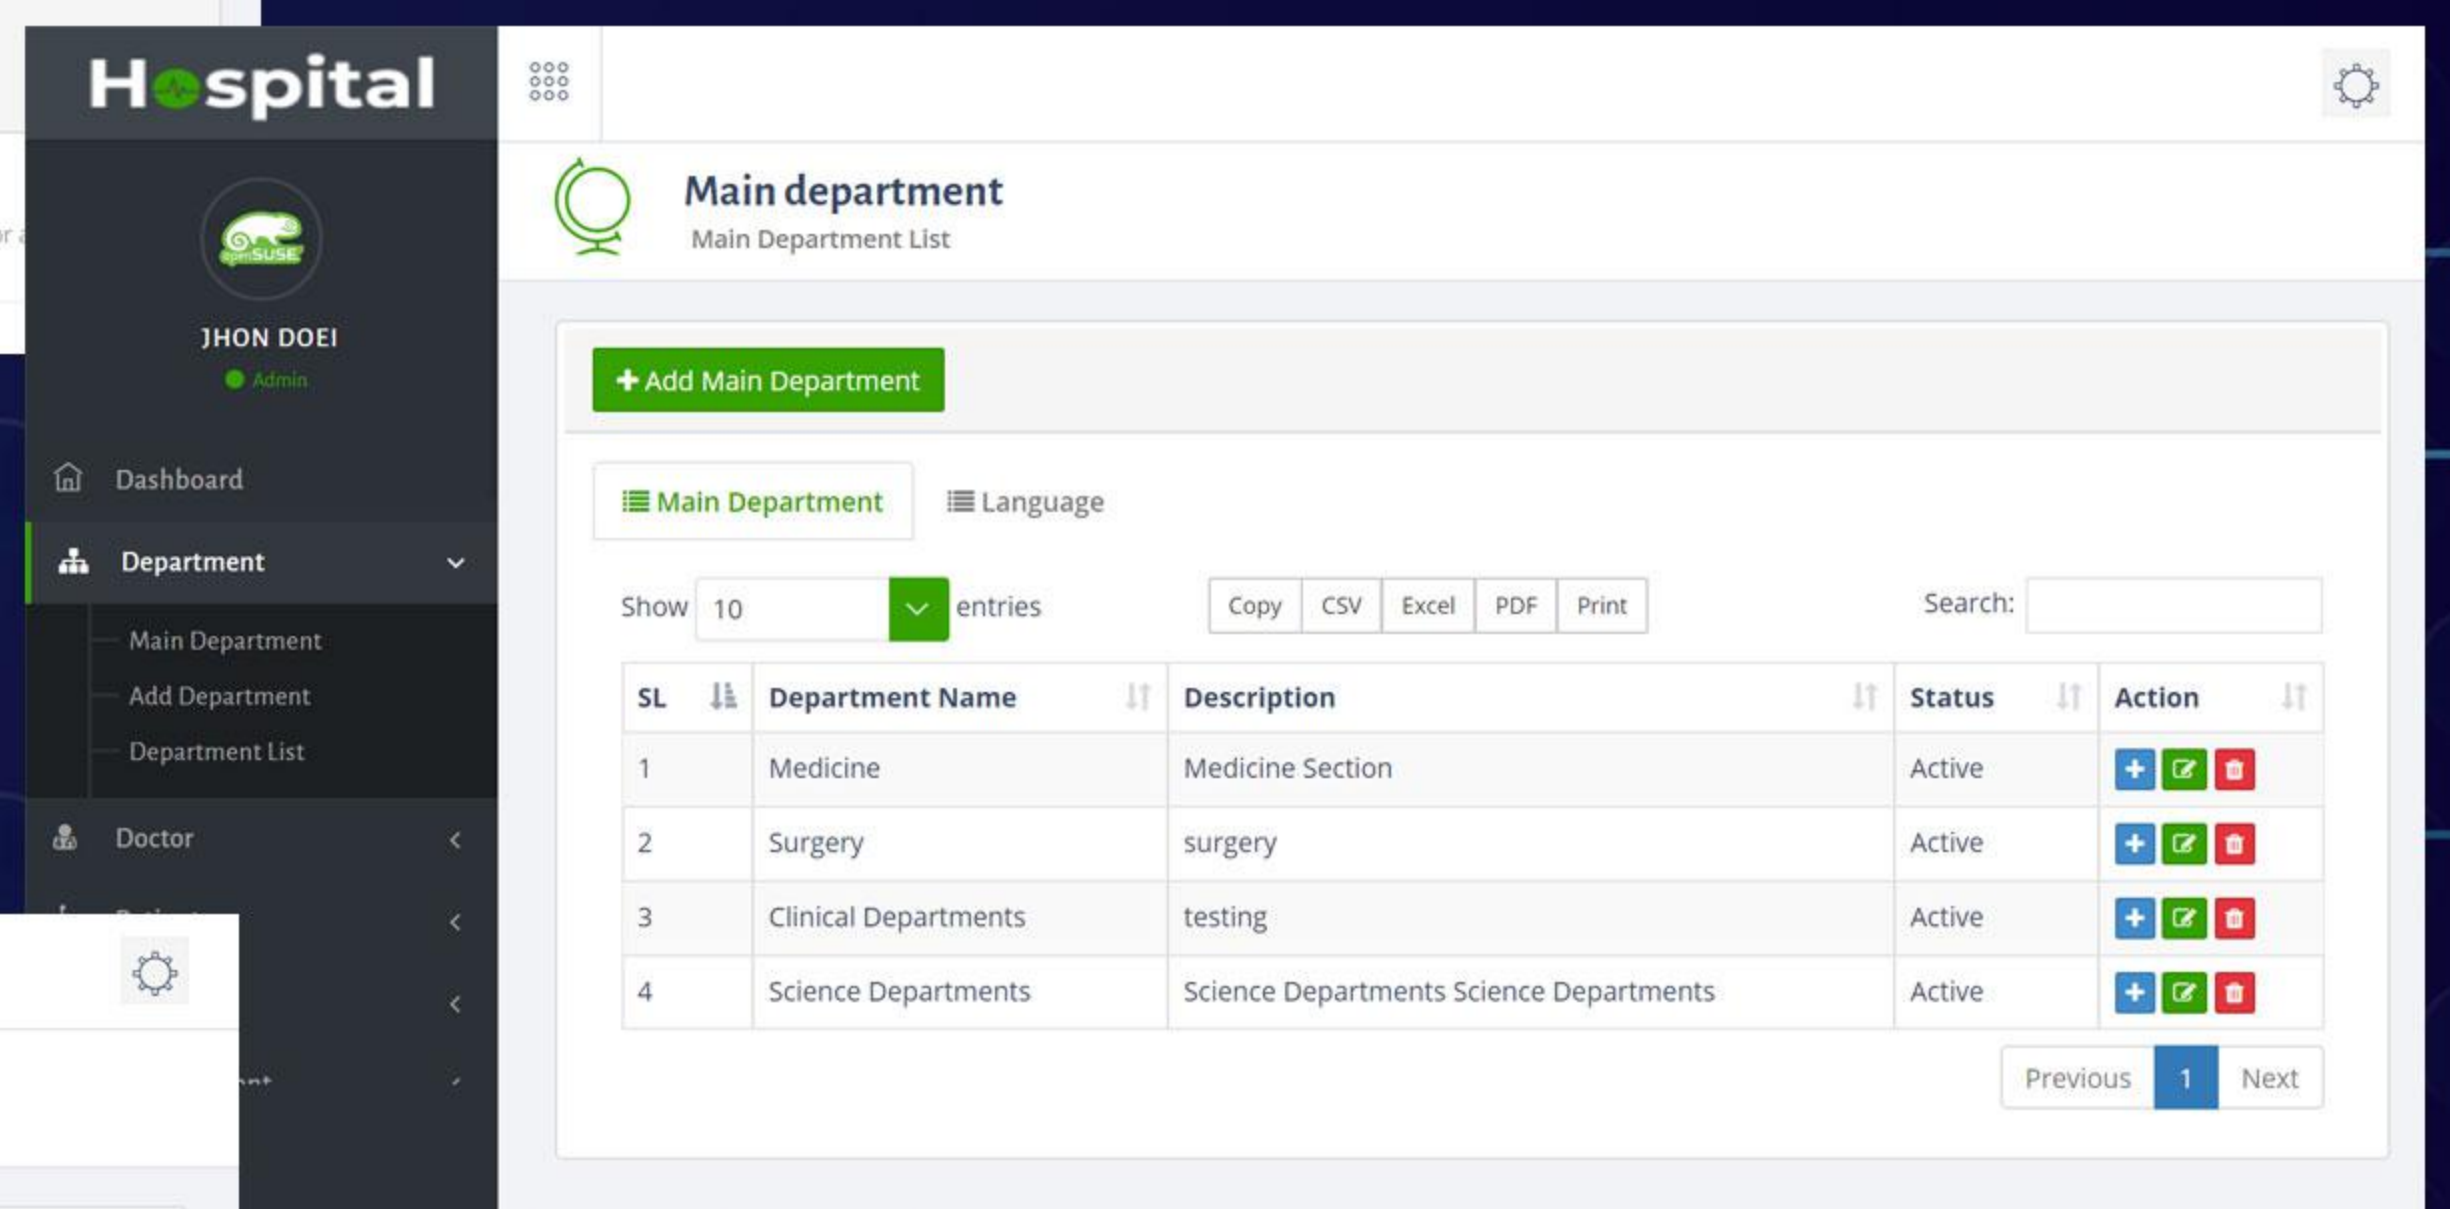

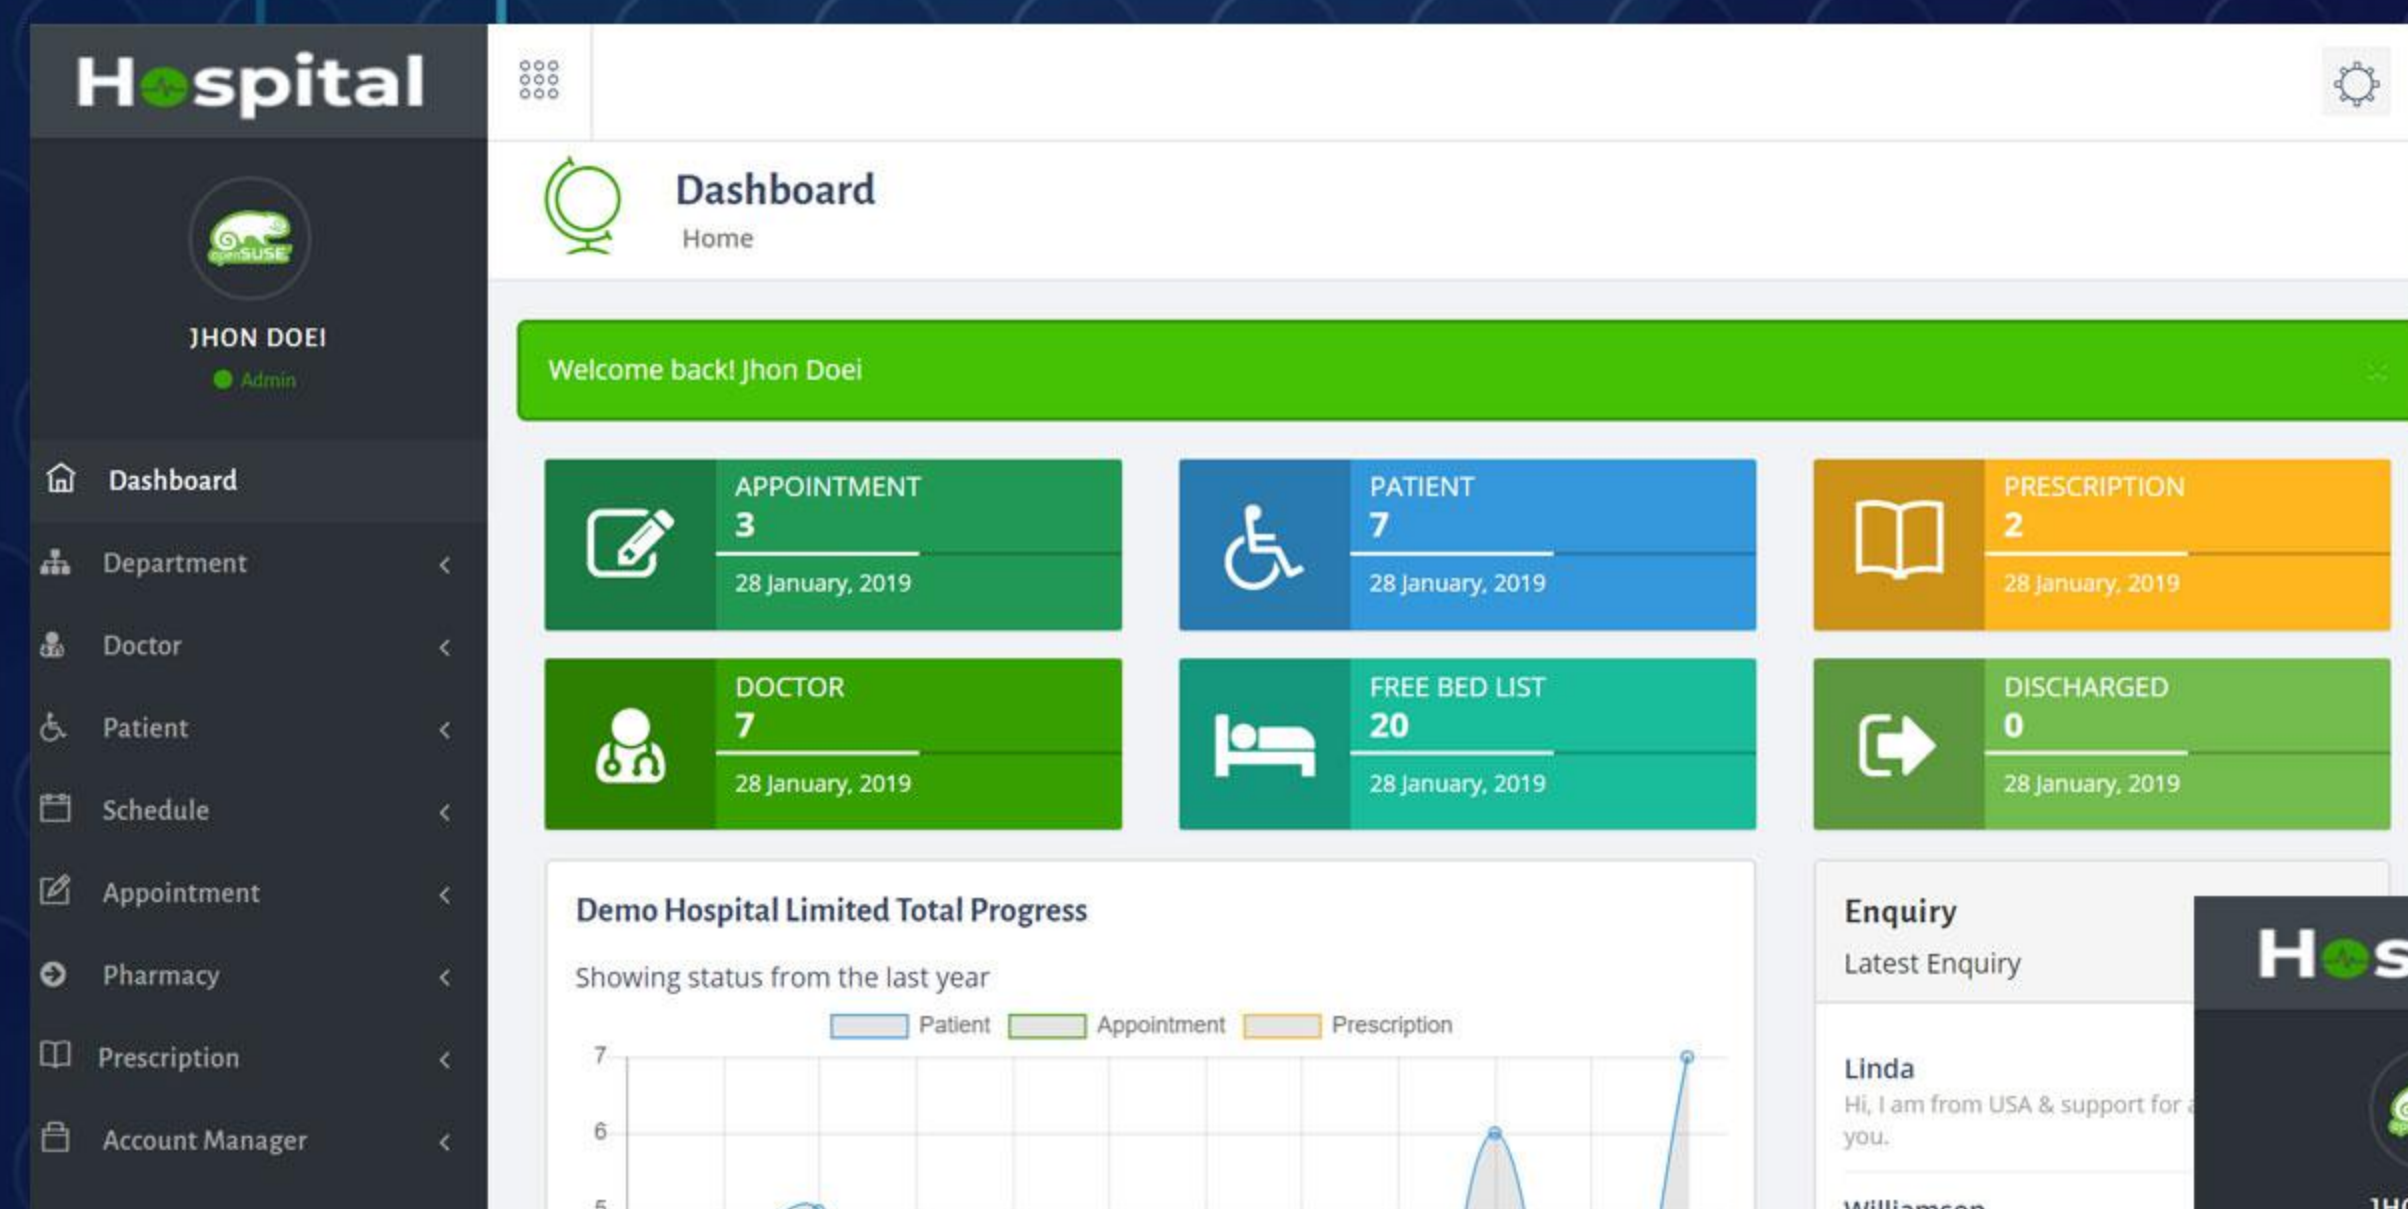

We offer fast, reliable and efficient package, mail and freight forwarding to over 220 countries.
